Steve,

The onsite cleanup criteria for PCBs is 2 ppm in soil and sediment in the Risk-Based Approval from EPA. The offsite criteria for sediment is 1 ppm.

Stay safe and healthy.

Thank you,

John

**** External Email ****

Hi John:

We only have one remaining comment and it is more of a clarification. I just wanted to verify that the cleanup number for onsite sediments is 2 ppm. Jim and Nancy both noted that for offsite sediments the number was 1 ppm, and thought it might have been the same for onsite sediments. Since I don't have access to much of the file, I just wanted to verify this.

Other than that, we feel that our other comments have been addressed.

Thanks,

Steve
